

PROJECT REPORT for 2002
ARKANSAS CORN AND GRAIN SORGHUM
PROMOTION BOARD

Title: Economic Analysis of Corn and Grain Sorghum Production Practices

Investigators: Dr. Tony E. Windham
Extension Economist – Management
Section Leader – Agricultural Economics

Crop: Corn and Grain Sorghum

The objective of this study is to provide an economic analysis of the Research Verification Program, of the project “Helping Arkansas Rice Farmers Exploit Market Opportunities by Improved Use of Soybean, Wheat, and Corn in Rice Rotations” (M.M. Anders), and other Corn and Grain Sorghum Promotion Board funded projects that would benefit from such an analysis.

Results will be made available through research and extension publications and at county producer meetings.
